SKYCITY IS CONNECTED TO EVERYTHING!

We already know the size of SkyCity will change the skyline of Winnipeg. But more importantly, it will also change downtown living. From its inception, SkyCity has been designed to offer the best practices in contemporary urban planning to Winnipeg, where walkability and bringing richness to the urban lifestyle experience are key. This inspired mixed-use project is set on Winnipeg's Transit Mall and in the SHED. Right in the heart of downtown, SkyCity connects to Waterfront, the Forks, Exchange and Broadway!

In cold weather, you can walk out your door without a jacket and use the Skywalk that connects you to the multiple office buildings, businesses and MTS Centre in the heart of downtown. Who really needs a car? SkyCity is on the transit mall, giving residents the option to take transit or walk: and put their money towards ownership of your elegant suite – overlooking the excitement of downtown! SkyCity is a win-win for residents and downtown Winnipeg too!

SKYCITY ADDS A WINNIPEG FLAIR

SCATLIFF+MILLER+MURRAY LANDSCAPE ARCHITECT FOR SKYCITY

When it came to designing the outdoor spaces and how SkyCity interacts with the downtown we turned to the Winnipeg firm Scatliff+Miller+Murra. The design firm was formed with the sole purpose of developing bold new concepts and high-level designs for urban revitalization and sustainable development. Innovative thinking and the practical, on-the-ground, experience that gets projects built is their signature.

S3 INTERIOR DESIGN DECOR FOR MODEL SUITE

Founded in 2003, Winnipeg-based s3 Interior Design Inc. is a professional interior design firm that prides themselves in producing eco-friendly, locally sourced and emotionally durable designs tailored to each client's unique needs. True to their name, s3 focuses on their three S's of Smart, Sustainable and Spaces to make a difference in sustainability through the built environment.
